Apr 10, 2019 Visma SPCS Administration V5.2 - Changelog. Category:Software companies of Sweden Category:Computer companies of Sweden Hi all, I just got a new 571C I am still trying to figure out why the 10-71 tube in the 571C is not working. The 571 is great but this tube really doesn't want to pick up video. I have already (3 times) tried all combinations of osc port settings, just no luck. Any ideas? Thanks, Bob John December 20, 2003, 09:57 PM Hi Bob. I'm not sure I can help you much but I'll tell you what I know. First, you should have a contact us link at the bottom of this page. You'll find your manufacturer's manual there, and also info about the video IF you want to post it. I also have a 571 for sale, with an IF from Kinesis. If you want to post up a picture of the IF, I'd be interested in looking at it. Meanwhile, if you want to check on the Tube itself, and take a picture, you're welcome to do so. I can then see if I can work it out. cheers, Jamie redeye December 20, 2003, 11:19 PM no pictures? John December 21, 2003, 02:13 AM Hi John, No pictures, sorry, I'm still to the point of disconnecting it at the jack and seeing if it will work. I already have a Kinesis video IF and it works fine. Thanks. JillyB December 21, 2003, 04:09 AM John - I only have parts in it, but I don't know exactly what you mean by "osc port settings." If you mean for the video IF, the only one I have is the H-video with pin #3. I use the speaker IF (oscillator) on pin #5. You need a video signal IF in pin #3 of the video IF which connects to the 571 C. It should be an H-video IF, so you should be able to find an H-video video IF anywhere for like \$20. Or you could order one on ebay
